We are witnessing the end of an era where doctors and nurses deliver care without knowing a patient's medical history other than what the patient might recall, what a family member might mention, or what an individual medical record might contain.

**No Matter Where** is a 77 minute documentary film that follows pioneers who are transforming healthcare into a system where patient information is available no matter where it is needed.

**No Matter Where** is produced by Kevin Johnson, MD, Chair of the Department of Biomedical Informatics at Vanderbilt University in Nashville, Tennessee.
